

Expert manufacturer of customized removable insulation covers for more than 16 years

THERMOFAB Kevlar® & Stainless Steel sewing thread is a three ply twisted thread made with a fine filament Kevlar® and stainless steel wire.

THERMOFAB Kevlar® provides high strength and high temperature resistance for applications where other threads fail.

THERMOFAB Kevlar® & Stainless Steel is designed for high temperature and heavy duty applications. The Kevlar® will melt at approximately 700°F but the stainless steel wire will maintain its strength to over 1000°F.

PROPERTIES

Diameter	.010"
Tensile Strength	20.5 lbs
Yields	2950 yds/lb
Twist	"Z"
Fiber	Kevlar®
Reinforcement	Stainless Steel
Coating	Teflon®
Finish	Silicone Lubricated
Put-ups	1 lb. spools
