Insulite™

**NEW GENERATION
HIGH PERFORMANCE INSULATION BLANKET**

WEIGHT

50%

**LIGHTER THAN
CONVENTIONAL BLANKETS**

THERMAL CONDUCTIVITY

20%

**MORE EFFICIENT THAN
CONVENTIONAL BLANKETS**

SAFETY

0%

**CERAMIC OR
ASBESTOS CONTENT**

Improves energy-retention of removable insulation pads while making handling faster and safer.

You expect high output from your workers and contractors: we have the stuff to make their job quicker and secure, while providing better insulation! In order for thin removable pads to insulate efficiently, heavy glass blanket had to be used; but not anymore: Introducing **Insulite™**, the light-weight - high performance blanket insulation manufactured with patented equipment by TRITEX.

This state of the art product eliminates the need for heavy glass insulation to be used in the manufacture of insulation pads. The finished products are 35 to 50% lighter; yet their insulation factor improves by 20% compared to conventional covers. This equates to more energy savings, faster installation, removals and re-installations and safer handling for workers

SPECIFICATIONS

Thickness	1/4"	1/2"	1"
Width	50"		
Roll Length	89' (1/4"), 45' (1/2" & 1")		
Service Temperature	1100°F		
Thermal Conductivity			
Temperature	BTU.in/(hr.ft ² .°F)		
250°F	0.22		
500°F	0.35		
750°F	0.58		
1000°F	0.89
