

PRODIMAX TRACER-WRAP

Easy to install and remove insulation for pipes and rolls

Tracerwrap is specifically manufactured to insulate heating lines and piping on industrial sites, thus preventing process fluids from freezing in cold climate conditions. It is easy to install and will remain flexible even when exposed to high temperatures, sunlight, ozone, rain or snow for prolonged periods of time.

ADVANTAGES:

Lined with Velcro®: Easy to install and remove for inspection

SPECIFICATIONS

Manufactured with high temperature materials: silicone-coated E-glass fabric and 100% glass insulation (no binder) are used to insure thermal resistance and high performance insulation

Impervious: will not get wet, neither is it damaged by water (during high-pressure cleaning or other operations)

Resistant to ozone, sunlight, ultra-violets as well as mild chemicals

Fire retardant materials : Available for internal temperatures up to 800°F
