

Expert manufacturer of customized removable insulation covers for more than 16 years

2175NR Textile is woven from "E" glass, highly texturized continuous filament, Silica based (56%) yarn. Totally free from any asbestos. It is red in colour to clearly differentiate this fabric versus asbestos fabric. Meets MIL-C-20079H Type 1, Class 9.

Chemical Resistance

2175 Texturized Fiber resists most Acids, Alkalis and Solvents. (Exceptions are Hydrofluoric Acid and Corrosive environments at elevated temperatures).

Applications

Insulation for Piping, Jacketing, Fire blankets.

Fire Resistance :

- Meets requirements for incombustibility as specified by U.S Coast Guard 164.009 and NFPA 701 for material that withstands high temperature without combustion.- 5 Smoke Developed Index.

Properties :

Weight	17.50 oz/yd ²
Weave	Plain
Thickness	0.032"
Roll Size	60" wide X 50 yds long
Service Temperature	1000°F (538°C)
Melting Temperature	1600°F (872°C)
