

Expert manufacturer of customized removable insulation covers since 1996

9165 is designed to have a very reflective and shiny PTFE coating surface on a rugged fiberglass reinforcement. The reflective PTFE surface targets lower emissivity value and improved insulation performance.

Used for removable insulation service, the 9165 offers the potential of improved energy savings due to its reflective surface.

Advantages :

- Very reflective and shiny PTFE surface targets better insulating properties
- Severe chemical and temperature exposure capabilities
- Flame resistant

Properties :

Colour	Grey
Weight	16.5 oz/sq.yd
Thickness	0.015"
Width	60"
Temperature limit	600°F
Film & Impregnation Sublimation point	621°F
Tensile Strength	
Warp	400 lbs/in
Fill	300 lbs/in
Coating	PTFE Teflon coated and impregnated
Fabric	Glass
